*Chose Font for Pedro Braga

Merriweather / Source Sans Pro

Interests: I am a junior developer with a growing interest in Web Development technologies. It is a field of study that fascinates me due to the complexity of choices and the many different of way of achieving a certain goal. I love symmetry and visual arts, and I find that web development filled this void. Above all, I love connecting with people in meaningful ways, and the pursuit to make such connections on my own term means a lot to me.
